RW26422-UN: Vehicle Monitor Indicators

LEGEND:

- A - PRIORITY-Stop Engine Symbol
- B - PRIORITY-Service Alert Symbol
- C - PRIORITY-Information Symbol

IMPORTANT:

See your John Deere Dealer if any system indicates malfunction.

Vehicle monitor warning system alerts operator to malfunctions or needed service of the engine, transmission, electrical and hydraulic functions.

Indicators light and warning horn sounds momentarily when the key switch is turned to the ON position.

A serious malfunction is indicated when the **Stop Engine Symbol** (A) flashes and warning horn continues to sound in conjunction with a system indicator and function indicator. **Stop engine immediately** and determine the cause.

A serious problem has developed when the **Service Alert Symbol** (B) flashes and warning horn sounds in conjunction with a system, function, or status indicator. Observe gauges and indicator lights.

Automatic Shutdown System - Engine will stop if the tractor is in PARK position, operator is not present, and the **Stop Engine Symbol** is active for more than 3 seconds.

A problem has developed when the **Information Symbol** (C) flashes in conjunction with a system, function, or status indicator. Continue to operate tractor and address problem when convenient.

Service codes can be viewed on the digital display whenever a "priority" lights. (See Changing Display Functions in this section.) One problem will be displayed at a time, with most severe problem overriding all others. (See Service Codes Section.)
