SAFETY SIGNS

Safety-Alert Symbol

Read and recognize safety information. Be alert to the potential for personal injury when you see this safety-alert symbol.

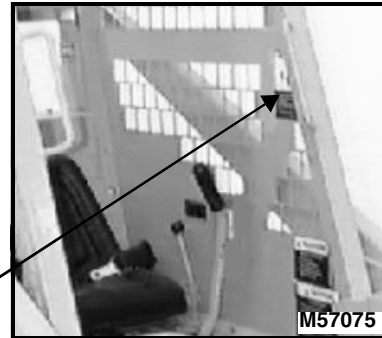

On your machine safety labels, the words DANGER, WARNING, and CAUTION are used with this safety-alert symbol. DANGER identifies the most serious hazards. In this manual, the word CAUTION and this symbol call attention to safety messages.

OPERATE SAFELY

Operator Training Required

- Read operator's manual.
- Know location and function of controls.
- Keep safety devices working.
- Keep screens and windows in place.
- Study operation section of this manual before operating the machine.
- Operate machine in an open, unobstructed area under the direction of an experienced operator.
- Operator experience is required to learn the moving, stopping, turning and other operating characteristics of the machine.

Use Seat Belt Properly

- Use a seat belt when you operate with a roll-over protective structure (ROPS) or cab to minimize chance of injury from an accident such as an overturn.

Thank you so much for reading

OPERATE SAFELY

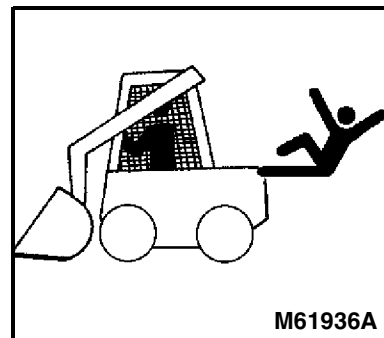

Protect Children

- Keep children and others away when you operate machine.
- Before you back up or turn, look behind and around skid steer loader for children.
- Do not let children operate loader.
- Do not let children ride on loader.

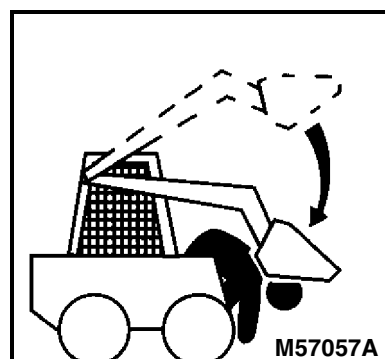

Keep Riders Off Machine

- Never carry riders. Only allow the operator on the machine.
- Riders on machine are subject to injury such as being struck by foreign objects and being thrown off of the machine.
- Riders also obstruct the operator's view resulting in the machine being operated in an unsafe manner.

Park Safely

- Lift arm stops must be ENGAGED (when boom is raised ONLY).
- Bumping floor pedal or part failure can cause lift arms to fall.
- Lower lift arms, ENGAGE park brake, STOP engine and remove key before leaving.
- Keep cab clean, especially pedal area.
